Erwinia amylovora hypersensitive response elicitor (HRE). 07-DEC-1998 (first entry) Hypersensitive response elicitor; HRE; insect resistance; biological control; transgenic plant.

Erwinia amylovora.

28-FEB-1997; 97US-0039226. 26-FEB-1998; 03-SEP-1998. W09837752-A1. 98WO-US03604

Wei Z, Zitter TA; (CORR) CORNELL RES FOUND INC

Use of hypersensitive response elicitor polypeptide - for application to plants or seeds or transgenic plants or seeds for the control of insects. WPI; 1998-495374/42. N-PSDB; AAV54607.

Sequence

The present sequence represents a hypermensitive response clicitor process (size of the content of the process of the content of the process of the process

Claim 4; Page 10-II; 94pp; English.

New fragments of an Erwinia hypersensitive response elicitor protein and related DNA - used to impart disease resistance to plants, to

their growth and to control insects

Erwinia amylovora hypersensitive response elicitor protein
```

Hypersensitive Erwinia amylovora response elicitor; comycete; loss; antifungal transgenic plant; injection

26-JAN-2001; 2001WO-US02579

26-JAN-2000; 2000US-0178565

FOUND INC

Bauer DW;

New chimeric gene, useful for controlling plant-pathogenic fungi and producing comprese-registant transgenic plants, comprises first DNA encoding hypersensitive response elicitor, promoter and regulatory region .

Claim 9; Page 13-14; 72pp; English

The impaction relates to a chiments gone that includes a first DNA contents enough a hypersensitive response childron processor of polypeptide, premoter operably linked 5 to the first DNA molecule of the first polypersens of the first polypersens of the first DNA molecule. The invention also relates to the treat DNA molecule. The invention also relates to transaction plant resistant to distance resultant of monoports of the promoter induces transcription of the first DNA molecule. The promoter induces transcription of the first DNA molecule in the promoter induces transcription of the first DNA molecule. The promoter induces transcription of the first DNA molecule in the promoter induces transcription of the first DNA molecule in the plant DNA molecule in the pl

The httpl gene was isolated from & amylowore using a 48-fold degenerate oligonuclectieg probe corresponding to make on acids 9-13 degenerate oligonuclectieg probe corresponding to make the k-remminus of harpin. The 44kD protein encoded by the httpl gene is a hypersensitive response elicitor protein. The harpin is thought to be an archetype for ms elicitors from phytopathogenic thought.
                                                                                                                                                                                                                                                                       Hypersensitive response elicitor protein derived from Erwinia
amylovora - and DNA mocoding it. useful for developing barpin
inhibitors to prevent e.g. fire blight of fruit

(EDEN-) EDEN BIOSCIENCE CORP.

Hypersensitive response elicitor protein; hairpin disease resistance; seed quality; insect control; Lepidoptera larvae; transgenic plant.

COLU DOLEL

A hypersensitive response elicitor protein.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    This sequence represents a novel Erwinia chrysanthemi proctain, hrpk-reb, that elicits a hypersensitive response in plants. The encoding DNA can be used for imparting pathogen resistance to plants, by transforming a plant with a weetor containing the DNA and a pathogen-inducible promoter.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Claim 2; Column 29-30; 27pp; English

The present sequence is a hypersensitive response elicitor protein from brainia chrysanthemi. The protein is heat stable and used to impart stress resistance to plants.

No. is the number of results predicted by chance to have a
some greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  protein search, using sw model
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                US-09-770-693-3

Pred. No. is the number of results predicted by chance to have a
score of the result han or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
